Enterprise foreign economic activity subject-object relations providing for integration into the world economy

Kazan Federal University, 420008, Kremlevskaya 18, Kazan, Russia

Abstract

© 2018. The innovative way of development announced by the President of Russia in the current economic conditions requires new approaches to the realization of the scientific, technical and innovative potential of Russia's regions. Projects associated with the introduction of innovative technologies, financing of research and development are characterized by a high degree of risk - the investment can bring significant profits, but may not pay off if the idea turns out to be erroneous or if it fails to be brought to the commercial implementation.

Keywords

Project financing, Territory development, Venture, Venture financing
